

Aaltosilta

The easy-to-install AALTOSILTA arch bridges of Aaltopuu Oy, manufactured in Finland, will add that something special to your backyard or garden. The bridges are made of untreated pinewood.

AALTOSILTA comes in a 36*52*110cm(74kg) box. The package includes everything you need to install the bridge, even a wrench. Instructions are also available on our website.

With the AALTOSILTA extra package, you can add to the length of your bridge 85 cm at a time. The length of the basic bridge is about 220 cm and the length of the extra package about 85 cm. The radius of curvature is about 7 metres and width 70cm.

The package includes detailed installation instructions in Finnish, Swedish and English. The Finnish and Swedish instructions include illustrations.

Due to the small size of the package, you can transport an Aaltosilta bridge in a car.

The bearing capacity of Aaltosilta bridges has been tested on a 6.5 metre bridge (basic bridge + 5 extra packages) with both ends of the bridge attached to the ground. The bridge was loaded in the middle of the span with 2,722 kg, and it was not damaged in any way.

A basic bridge was also loaded with 2,722 kg with no notable damage to the bridge.

Bridge lengths/number of extra packages

about 308cm = 1	about 643cm = 5
about 394cm = 2	about 721cm = 6
about 479cm = 3	about 797cm = 7
about 561cm = 4	about 870cm = 8
